CONTENUTO E CARATTERISTICHE TECNICHE DEI DATI DELLE DICHIARAZIONI DEI REDDITI MODELLO 730/2023 DA INVIARE ALL'AMMINISTRAZIONE FINANZIARIA IN VIA TELEMATICA

1 AVVERTENZE GENERALI

I Sostituti d'imposta, i Centri di Assistenza Fiscale, i professionisti abilitati, le società e gli enti di grandi dimensioni, nonché gli intermediari abilitati, trasmettono i dati delle dichiarazioni dei Mod.730, all'**Agenzia delle Entrate** in via telematica.

Il contenuto e le caratteristiche della fornitura dei dati da trasmettere all'Agenzia delle Entrate in via telematica sono riportati nelle specifiche tecniche di seguito esposte.

Si precisa che una dichiarazione da inviare, i cui dati non sono conformi alle indicazioni delle presenti specifiche tecniche, verrà scartata.

Le modalità per la trasmissione dei dati in via telematica sono stabilite con il decreto del 31 luglio 1998 (pubblicato nella G.U. del 12 agosto 1998, n. 187) e successive modificazioni.

2 Brevi cenni sul linguaggio XML

L'Agenzia delle Entrate ha scelto di adottare, per la definizione della fornitura relativa alle dichiarazioni **730/2023**, il linguaggio XML (eXtensible Markup Language).

L'XML è un metalinguaggio, ossia una "grammatica", per la definizione di documenti da gestire con strumenti informatici.

Per "grammatica" si intende l'insieme standard di definizioni e di regole sintattiche mediante le quali la struttura logica di un documento viene tradotta in una corrispondente struttura fisica, composta di elementi sintattici chiamati **tag**, ossia sequenze di caratteri delimitate dai segni '<' e '>'.

Concretamente, un file XML è un **file di testo** costituito da diversi **elementi individuati dai tag, ciascuno dei quali identifica un componente logico del documento.**

Gli elementi sono organizzati secondo una struttura gerarchica: ciascun **elemento** può infatti contenere altri elementi (**sottoelementi**) oppure del testo. L'elemento principale della struttura "ad albero" così ottenuta è denominato **radice (root element)**.

Agli **elementi** possono essere associate altre informazioni che ne descrivono le proprietà, tali informazioni sono chiamate **attributi**.

La modellazione della fornitura delle dichiarazioni **730/2023 è stata realizzata prevedendo la radice denominata Messaggio, all'interno della quale sono stati individuati i due sottoelementi Intestazione e Contenuto.**

L'elemento Intestazione espone il codice fiscale del soggetto responsabile dell'invio telematico, l'elemento Contenuto definisce al suo interno una Fornitura astratta che, nel caso del modello **730/2023**, assume le caratteristiche di quella ad esso relativa e descritta nel paragrafo 5. L'elemento Contenuto espone l'attributo `codiceFornitura` che per il suddetto modello deve essere impostato al valore **73023**.

Nel paragrafo 5 vengono fornite ulteriori indicazioni relative agli elementi sopra citati.

La struttura della fornitura xml è descritta, mediante l'**XML Schema**, in uno specifico documento (**schema document**), identificato dall'estensione "**xsd**". Il file XSD (XML Schema Definition) delinea il contenuto della fornitura definendone gli elementi ed evidenziandone attributi e relazioni reciproche.

In particolare, lo **schema** relativo alla fornitura xml identifica tre diverse tipologie di componenti: elementi di significato generale, ossia indipendenti dal tipo di documento contenuto nella fornitura stessa, elementi che rappresentano i componenti logici di una generica dichiarazione ed elementi che costituiscono, più specificamente, la struttura di una dichiarazione Modello 730.

Ciascuna delle suddette tipologie di componenti individua un "dominio di nomi" (**namespace**), un ambito nel quale gli elementi sono univoci ed hanno significato omogeneo.

Concretamente, lo schema relativo alla fornitura 730 si compone di un insieme di documenti `xsd`, associati ai tre diversi namespace, nei quali sono definiti, oltre agli elementi della fornitura, anche i tipi di dati ad essi associati ed alcuni elenchi di codici predefiniti previsti per gli elementi della dichiarazione.

3 CONTENUTO DELLA FORNITURA

3.1 Generalità

La fornitura oggetto della trasmissione telematica deve essere conforme alle specifiche dell'eXtensible Markup Language (XML) 1.0 (raccomandazione WC3 10 febbraio 1998) e deve essere codificata secondo la codifica UTF-8.

Il contenuto della fornitura xml, relativa al Modello 730/2021, deve inoltre soddisfare la sintassi descritta nel file XSD denominato “**fornitura730_2023_v1.xsd**”, allegato al presente documento.

Il suddetto schema definisce la struttura della fornitura xml, delineando gli elementi permessi, i loro attributi, i tipi di dati ad essi associati e la relazione gerarchica tra gli elementi stessi.

La procedura distribuita dall'Agenzia delle Entrate esegue una prima fase di **validazione** della fornitura, ossia di verifica che il file sia conforme allo schema ad esso associato ed una successiva fase di **controllo**, nella quale esamina la correttezza dei dati indicati applicando regole specifiche per ciascun elemento.

L'esito negativo della validazione determina lo scarto dell'intera fornitura.

I diagnostici generati in fase di **controllo** possono avere una diversa gravità a seconda dell'elemento interessato e possono determinare lo scarto della singola dichiarazione o dell'intera fornitura.

3.2 Coerenza dei dati della dichiarazione

Nella “*Circolare per la liquidazione ed il controllo del modello 730/2023*“ trovano esposizione anche le regole che definiscono l’accoglimento o meno della dichiarazione 730/2023 da trasmettere in via telematica all’Agenzia delle Entrate. In particolare sono riportati, oltre a tutti i criteri per la puntuale determinazione delle imposte, anche i criteri di accoglimento della dichiarazione. Tali criteri, sono suddivisi in confermabili e bloccanti. La dichiarazione 730/2023 predisposta con le modalità previste nelle presenti specifiche tecniche XML, deve essere conforme ai criteri sopra citati. La non conformità della dichiarazione ai suddetti criteri, determina il non accoglimento della stessa in sede di trasmissione telematica.

3.3 Il trattamento del Codice Fiscale

I codici fiscali riportati nelle dichiarazioni mod. 730/2023 devono essere formalmente corretti. Si precisa che in sede di accoglimento delle dichiarazioni trasmesse in via telematica, costituirà oggetto di scarto della dichiarazione stessa l’indicazione di un **codice fiscale del contribuente** che, anche se formalmente corretto, non risulti registrato presso l’Anagrafe Tributaria.

Nel caso di omocodia del codice fiscale del contribuente risolta dall’Agenzia delle Entrate con l’attribuzione di un nuovo codice fiscale, l’indicazione in dichiarazione del precedente codice fiscale (omocodice) comporta, in sede di accoglimento delle dichiarazioni trasmesse in via telematica, lo scarto della dichiarazione.

Il codice fiscale del rappresentante deve essere registrato in Anagrafe Tributaria; la non registrazione comporta lo scarto della dichiarazione in fase di accettazione **senza possibilità di conferma della stessa.**

Il codice fiscale del sostituto d’imposta che effettuerà le operazioni di conguaglio deve essere registrato in Anagrafe Tributaria; la non registrazione comporta lo scarto della dichiarazione in fase di accettazione senza possibilità di conferma della stessa.

Anche ciascun codice fiscale indicato nel prospetto dei familiari a carico deve essere registrato in Anagrafe Tributaria; la non registrazione comporta lo scarto della dichiarazione in fase di accettazione senza possibilità di conferma della stessa.

3.4 Soggetto che presta l’assistenza fiscale

L’indicazione del soggetto che ha prestato l’assistenza fiscale con i relativi dati identificativi e l’indicazione della data di consegna del mod. 730/2023 sono obbligatori. Si rimanda alle

istruzioni fornite nella circolare di liquidazione al paragrafo “Dati assistenza fiscale da riportare nel flusso telematico”.

4 TRASMISSIONE TELEMATICA DEL MOD. 730-4 DA PARTE DEI CAF, DEL PROFESSIONISTA ABILITATO, DI UNA ASSOCIAZIONE PROFESSIONALE E DEL SOSTITUTO D'IMPOSTA ALL'AGENZIA DELLE ENTRATE

Il D.M. n. 164 del 1999, prevede che i soggetti che prestano l'assistenza fiscale trasmettano i risultati finali delle dichiarazioni relative al mod. 730 (mod. 730-4) non più direttamente ai sostituti d'imposta ma all'Agenzia delle Entrate la quale provvederà successivamente ad inviarli telematicamente al sostituto d'imposta.

Pertanto, in sede di trasmissione telematica delle dichiarazioni relative al modello 730/2023, i dati relativi al suddetto mod. 730-4 dovranno essere allegati ai dati della dichiarazione mod. 730/2023 da trasmettere in via telematica, anche nel caso di assistenza fiscale prestata dal sostituto d'imposta.

Dal'anno di imposta 2019 anche l'INPS ha aderito al flusso telematico del mod. 730-4 gestito da parte dell'Agenzia delle entrate nel caso di assistenza fiscale prestata da Caf o Professionista abilitato (Provvedimento del direttore dell'Agenzia delle entrate del 21 novembre 2019).

Pertanto, a partire dal modello 730/2020, i Caf ed i professionisti abilitati non dovranno più inviare in via telematica direttamente all'INPS il mod. 730-4, ma provvedere ad allegare tale modello 730-4 al modello 730 da trasmettere in via telematica all'Agenzia delle entrate, utilizzando le stesse modalità già previste per i modelli 730 con sostituto d'imposta diverso da INPS.

In sede di accoglimento delle dichiarazioni trasmesse in via telematica, costituisce oggetto di controllo la coerenza dei dati contenuti nel mod. 730-4 con quelli presenti nel modello 730/2023. Eventuali anomalie riscontrate determinano lo scarto della dichiarazione.

Ai sostituti d'imposta i dati relativi al mod. 730-4 saranno resi disponibili presso la sede telematica comunicata con l'apposito modello di comunicazione trasmesso all'Agenzia delle Entrate

4.1 Trasmissione telematica del mod. 730-4: Casi particolari

Nel caso in cui dalla liquidazione della dichiarazione (mod. 730 ordinario ovvero mod. 730 integrativo), risulti che non ci sia alcun importo da trattenere o da rimborsare a cura del sostituto d'imposta, i dati relativi al mod. 730-4 non devono essere riportati nel tracciato telematico della dichiarazione 730/2023 e deve essere impostato ad "1" l'apposito campo (**FlagAssenzaDati730-4**) previsto nelle presenti specifiche tecniche del modello 730/2023. La non corretta impostazione della suddetta casella determina lo scarto della dichiarazione 730/2023.

Si precisa che nel caso di un **modello 730 rettificativo**, qualora dalla liquidazione della dichiarazione risulti che non ci sia alcun importo da trattenere o da rimborsare a cura del sostituto d'imposta, i dati relativi al mod. 730-4 devono comunque essere riportati nel tracciato telematico della dichiarazione 730/2023. In tal caso risulteranno pertanto compilati i soli dati relativi al soggetto che ha prestato l'assistenza fiscale, al sostituto d'imposta, al contribuente con l'assenza di tutti i dati contabili.

4.2 Dati mod. 730-4 resi disponibili dall’Agenzia delle Entrate ai Sostituti o Intermediari

I dati relativi al mod. 730-4 saranno resi disponibili da parte dell’Agenzia delle Entrate ai sostituti d’imposta ovvero agli intermediari da questi incaricati in conformità alle istruzioni contenute nelle presenti specifiche tecniche relative al mod. 730/2023 nella sezione riferita alla **“Fornitura 730-4”**.

La sintassi della fornitura relativa ai mod. 730-4 è descritta nel file XSD denominato **“fornitura734_2023_v1.xsd”** la cui documentazione è allegata al presente documento.

5 Specifiche tecniche in formato XML

5.1 Generalità Specifiche tecniche in formato XML

5.1.1 Messaggio

Lo schema prevede la definizione di un elemento principale (radice della struttura) denominato **Messaggio**. Esso è un elemento xml di tipo complesso contenente la sequenza ordinata di due sotto-elementi obbligatori **Intestazione** e **Contenuto** dei quali può essere presente una sola occorrenza.

5.1.2 Intestazione

L'elemento xml denominato **Intestazione** è un elemento obbligatorio di tipo complesso **Intestazione_Type** illustrato nella figura seguente.

L'elemento **Intestazione** deve contenere i seguenti sottoelementi semplici rispettando la sequenza indicata:

CodiceFiscaleFornitore

È un elemento obbligatorio di tipo semplice che deve esporre il codice fiscale del soggetto responsabile della trasmissione telematica. Il dato è di tipo alfanumerico e può essere composto, in alternativa, o da 11 caratteri numerici (nel caso in cui il codice fiscale si riferisca ad una persona giuridica) oppure da 16 caratteri alfanumerici maiuscoli (nel caso in cui il codice fiscale sia relativo ad una persona fisica).

SpazioServizioTelematico

È un elemento opzionale che deve esporre alcune informazioni riservate al servizio telematico. Tale elemento, pertanto, viene creato esclusivamente da funzionalità predisposte dal servizio telematico. Il dato in esso contenuto è di tipo alfanumerico.

5.1.3 Contenuto

L'elemento xml denominato **Contenuto** deve contenere, al suo interno, i dati identificativi della fornitura ai fini della trasmissione telematica. Pertanto è un elemento di tipo complesso **Contenuto_Type** illustrato nella figura successiva.

In particolare tale elemento prevede un attributo denominato **CodiceFornitura** ed un sottoelemento **Fornitura**.

L'attributo **CodiceFornitura** identifica il codice della fornitura e serve per individuare in maniera univoca la tipologia di documento contenuto nel file. Tale elemento di tipo semplice è obbligatorio e deve essere composto da 5 caratteri alfanumerici maiuscoli. Per il modello 730/2023 deve assumere il seguente valore “**73023**”.

L'elemento xml denominato **Fornitura**, invece, è un elemento obbligatorio di tipo astratto che deve essere, di volta in volta, implementato dai diversi tipi di fornitura XML.

5.1.4 Fornitura

L'elemento denominato **Fornitura** ed è un elemento xml complesso contenente la sequenza ordinata di due sottoelementi: **Intestazione** e **Documento730**, del quale possono essere presenti una o più occorrenze.

5.1.5 Intestazione

L'elemento Intestazione contiene i dati del soggetto responsabile dell'invio telematico (fornitore):

- TipoFornitore - è l'elemento che definisce la tipologia del soggetto che esegue la trasmissione, è di tipo DatoNP_Type.
- SpazioUtente - è un elemento opzionale il cui contenuto può essere liberamente definito dall'utente ed è di tipo DatoAN_Type

5.1.6 Documento 730

L'elemento Documento 730 è di tipo Documento_730_Type. Il tipo Documento_730_Type definisce l'attributo obbligatorio denominato **identificativo**. Tale attributo ha lo scopo di identificare univocamente il generico documento nell'ambito della fornitura ed è di tipo DatoNP_Type.

Controlli previsti per l'attributo:

Validazione: la lunghezza massima prevista è di 5 caratteri.

Controllo bloccante: il valore assunto dall'attributo deve essere univoco all'interno dell'intera fornitura.

5.2 Comunicazione dati rettificati caf o professionisti (Codice Fornitura “73C23”)

L'articolo 39, comma 1, lettera a), del DLGS n. 241 del 1997, prevede che in caso di visto di conformità infedele su una dichiarazione modello 730, il professionista abilitato, il Responsabile dell'Assistenza Fiscale (RAF) e, in solido con quest'ultimo il CAF sono tenuti al pagamento di un importo pari al 30 per cento della maggiore imposta riscontrata, sempre che il visto infedele non sia stato indotto dalla condotta dolosa o gravemente colposa del contribuente.

La norma stabilisce che il Centro di assistenza fiscale o il professionista può trasmettere una dichiarazione rettificativa del contribuente ovvero, se il contribuente non intende presentare la nuova dichiarazione, può trasmettere una comunicazione dei dati relativi alla rettifica sempreché l'infedeltà del visto non sia già stata contestata con la comunicazione di cui all'articolo 26, comma 3-ter, del decreto del Ministro delle finanze 31 maggio 1999, n. 164.

La trasmissione delle informazioni relative ai dati rettificati deve avvenire con modalità analoghe a quelle previste per la trasmissione telematica dei dati del modello 730/2023 in conformità alle indicazioni fornite nella Circolare di liquidazione del modello 730/2023 ed impostando l'attributo CodiceFornitura al valore “73C23”.

5.3 Specifiche tecniche in formato XML

Di seguito viene descritto il contenuto informativo dei dati della fornitura da trasmettere in via telematica (**fornitura730_2023_v1.xsd** e **fornitura734_2023_v1.xsd**).

Per la rappresentazione grafica della struttura gerarchica sono utilizzati alcuni simboli grafici descritti nella seguente tabella:

	Elemento obbligatorio
	Elemento opzionale
	Elemento ripetuto 0 o più volte
	Sequenza ordinata di elementi (Sequence)
	Alternativa tra due o più elementi (Choice)
