

# EUROPE'S BUDGET

## Own resources

JULY 2025

New own resources are essential to support a more ambitious long-term budget that responds effectively to the Union's strategic priorities.

## Why is this a priority?

- The European Union faces growing demands in key areas. These shared challenges require a collective financial effort that goes beyond the current contributions.
- Introducing new own resources will reduce the burden on Member States and ensure the sustainable funding of common EU policies.

## What is the Commission proposing?

- Five new own resources.
- Adjustments to the current own resources.

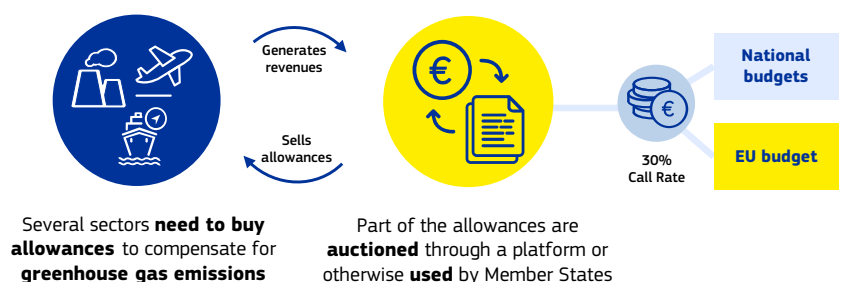

ETIAS fee generates an additional 0.3 billion  
All amounts in EUR billion

## A balanced package of five new own resources<sup>(\*)</sup>

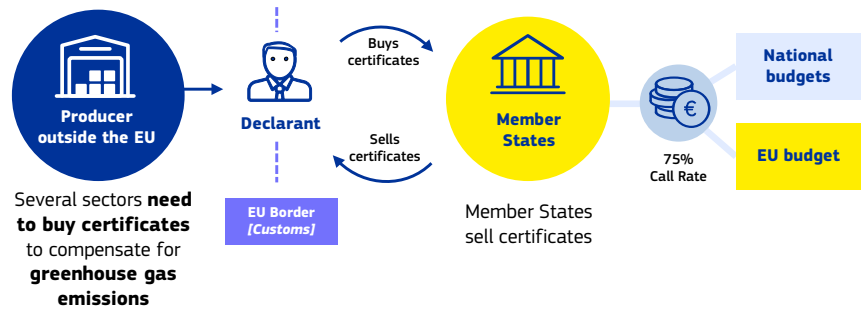

### EU Emissions Trading System (ETS)

based own resource: 30% of the revenues generated from existing ETS 1 to go to the EU budget. Expected to generate around €9.6 billion annually, on average.

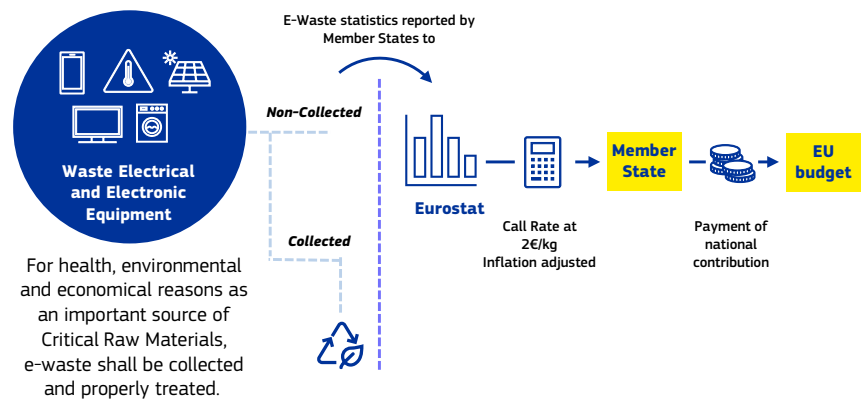

### Carbon border adjustment mechanism (CBAM)

based own resource: 75% of the revenues generated to be entered into the EU budget. Expected to generate around €1.4 billion annually, on average.

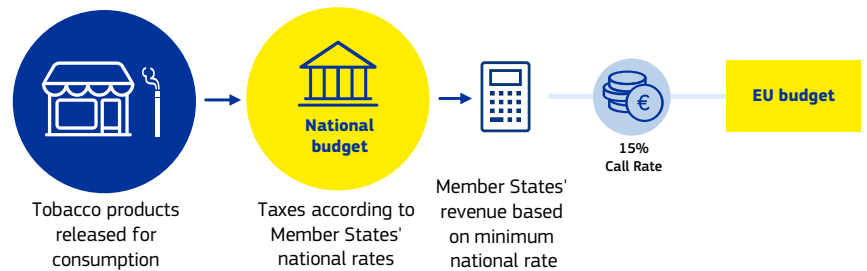

**Non-collected e-waste** based own resource: contribution resulting from the application of a call rate of 2€/kg, annually adjusted for inflation, to the weight of non-collected e-waste. Expected to generate around €15.0 billion annually, on average.

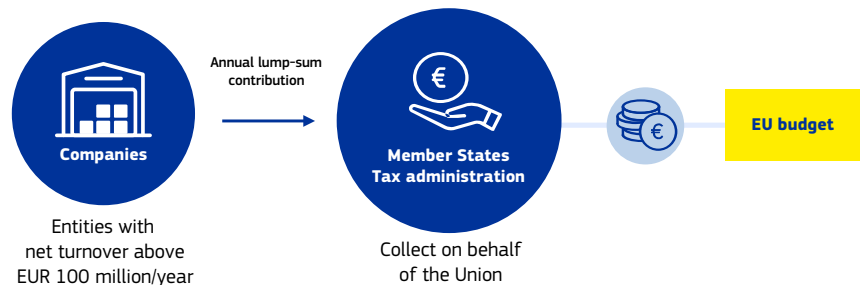

### Tobacco Excise Duty Own Resource (TEDOR)

15% of the revenues based on the Member State-specific minimum rate for manufactured tobacco and tobacco related products. Expected to generate around €11.2 billion annually, on average.

### Corporate Resource for Europe (CORE)

annual lump-sum contribution of all companies in scope operating and selling in the EU with an annual turnover above EUR 100 million. Expected to generate around €6.8 billion annually, on average.

## Adjustements to the current own resources

- Reduction of the collection costs to 10% for traditional own resources.
- Inflation adjustment of the call rate for the non-recycled plastic packaging waste own resource.
- Ensuring transparency: no correction mechanisms to own resources.
